PROJECT

ECOMMERCE WEBSITE
Ecommerce Website
to create a tool which can selling there own product through online. like amazon,flipkart.
Most dynamic website
admin can itself add delete the product selling and original prices too. and also add catogery like many more feture.
it is more comfortable to use in all devices it is more responsive to use
security
purpose we use default csrf token and using eloquent model to prevent sql injection like attack
Technologies Used In These Project:
html,css,javascript,bootstrap,jquery,laravel php,mysql

DATING WEBSITE
Dating Website to create find people to find there partner tinder like website.
Most efficient
for quick access we use ajax . it also created using mvc patten Technologies Used In These Project:
html,css,javascript,bootstrap,jquery,ajax,core php,mysql

BOOKING WEBSITE
Booking Website to create , find nearby rentable homes like ola.
Most Effecient
we can creating each part as seperate for loading fast the website Hooks
we also using hooks like usestate useselector for state managment and also we using useeffect like preload the data fast and more efficient website Security
we also using jwt token for most security purpose in the backend
Technologies Used In These Project:
React,nodejs,mongodb
